# Cancer Genetics for Primary Care Nurses

Wednesday, March 2, 2016 part one

Tuesday, April 5, 2016 part two

This program will help you use family history information to **identify and communicate with** patients who will benefit from increased cancer screening, genetic testing, and/or referral to a genetics specialist.

### The program features:

- interactive cases
- real time patient interaction
  - small group discussion
  - interprofessional development

### In this workshop you will learn how to:

- identify patients at high hereditary cancer risk;
- refer the right patients to the right providers;
- communicate with patients about their cancer risk and;
- provide guidance to patients about risk-reducing options.

**Location:** The Jackson Laboratory for Genomic Medicine, Farmington, CT

**Registration:** Go to [www.ctnurses.org](http://www.ctnurses.org)

**Cost:** \$30.00

Enrollment will  
be limited to first  
50 participants  
so don't delay

### EDUCATION CREDITS PROVIDED BY
